Experience

6sense

Senior Product Designer

Remote | Oct 2025 - Present

I lead end-to-end product design initiatives that drive consistency, scalability, and user-centered solutions across our platform ecosystem.

- Design and evaluate experience strategies that connect 6sense native data, customer systems, and a marketplace of 100+ data providers to create the richest possible go-to-market dataset.
- Own platform-level initiatives from discovery research through concept validation, experience design, and cross-functional alignment.

Product Designer III

Remote | Oct 2024 - Oct 2025

I led experience improvements for system integrations and other platform initiatives to enable product teams and their initiatives.

- Updated the experience to support OAuth for over 20 organizations using Snowflake, boosting data security and strengthening ties with 6sense.
- Updated the integration setup flow for 1,000+ customers to provide contextual guidance when setting up website tracking during their onboarding journey.

User Experience Designer

Remote | Apr 2022 - Oct 2024

I was responsible for improving the user experience of 6sense Revenue AI™ for Sales, a product that utilizes AI and big data to help salespeople work smarter and more efficiently.

- Led the redesign of the Revenue AI for Sales product with enhanced user experience. This resulted in user growth for over 85% of migrated organizations, achieving an average of 25K monthly users.

Zywave

User Experience Designer

Remote | Mar 2021 - Apr 2022

I served as a design resource for 3 mission teams, helping them identify project opportunities, research user insights, and deliver high-fidelity design solutions.

- Owned design initiatives across 4 product teams to maintained and improve employee benefit quotes and proposals experiences for over 15k insurance brokers
- Audit and improve components and best practices in Zywave’s proprietary design system to ensure a consistent user experience across all Zywave software products

Dawn Equipment

User Experience Designer

Madison, WI | Aug 2020 - Mar 2021

I worked as the only designer in-house, working with a small but talented development team on evaluating current applications, and uncover scalable design improvements.

- Designed the tablet application that helped 70+ farmers monitor and control Dawn equipments
- Collaborated with development team and internal stakeholders to improve digital farming experience

Kerry EAS Logistics

Management Trainee, Key Account Associate

Beijing, China | Aug 2017 - Aug 2018

I worked as a management trainee, gaining hands-on experience in all aspects of logistics by rotating through key accounts, warehousing, delivery, and logistics solutions.

- Conducted a detailed analysis of the outbound shipping dock layout for the parcel delivery service, leading a team of three to redesign the operation floor, which increased daily loading/unloading capacity from 6 to 12 truckloads.
- Managed Monthly warehouse inbound/outbound data for 33 key accounts within Kerry’s Northern region.

Leadership

ADPList

Certified Top Mentor

Completed 90+ sessions providing hands-on guidance in portfolio walkthroughs and mock whiteboard challenges for emerging designers.

Recognized as a Top Mentor for consistent excellence in upskilling and career coaching within the global design community.
